

LED lighting for DC 24V.  
Designed to illuminate the interiors of vehicles, as well as emergency lighting.  
Downlights in steel stiffened, colored plastic paint in white. The diffuser is made of plastic with special lighting prismatic surface or a smooth matte plastic.

**Technical data fixtures:**

- Input DC voltage : 24V;
- Input DC voltage range: 20V – 30V;
- Protection against electric shock -0;
- Protection classification penetration of foreign bodies and water IP10;
- Ambient temperature - 25 ° C-+45 °C;
- Service life - 10 years;
- Dimensions: picture 1.
